

3 CREDIT HOURS: FULL SUMMER-REMOTE LEARNING

ANTH 304 - LEXI O'DONNELL

BIOLOGICAL ANTHROPOLOGY

Course Description

Students will learn how anthropologists study biology to understand human origins and biological variation. Course sections include basic genetics and epigenetics, the study of human skeletons from forensic and archaeological sites, observations of modern primates such as chimpanzees and monkeys, and identification and analysis of ancient pre-human fossils.

Prerequisites - 24 Earned Credit Hours
